INTRODUCTION

The early childhood years establish the foundation for later learning success. The Prekindergarten through 3rd grade (P-3) Tool is a planning and reflection tool for use by states, districts, schools, early childhood programs, and classrooms to align more coherent policies and practices to support improved outcomes for students in prekindergarten through third grade. This tool serves as a companion to the Kristie Kauerz and Julia Coffey 2013 framework entitled [Framework for Planning, Implementing, and Evaluating PreK-3rd Grade Approaches](#).

What is P-3? According to Kauerz, “What matters most to the success of P-3 approaches is ensuring that children have consistent, coherent, high-quality learning opportunities provided to them every day, year after year. P-3 efforts can frame the context, supports, and incentives to support consistency across early learning programs, schools, families, and teachers.”

Table 1 below presents a snapshot of what P-3 is and is not.

P-3 TOOL STRUCTURE

Preparation and Design We recommend that all of those using the tool begin by reviewing and completing the preparation section. This section includes a review of the current status of the team in the process. The process begins with the establishment of goals, identification of priority areas of focus.

PREPARATION AND DESIGN PHASE INSTRUCTIONS:

1. Identify the individual or core team who will be engaged in P-3 planning and implementation.
2. Encourage all team members to review the tool. (Distribute the tool electronically or use paper copies based on what works)

PREPARATION AND DESIGN PHASE: During this phase, the coordinator and team work to set the stage for the effort.
