The Next Generation English Language Arts (ELA) and Mathematics Learning Standards intend t foster the 21st century skills needed for college and career readiness and to prepare students to become lifelong learners and thinkers. Learning standards provide the "destination" or expectation of what students should know and be able to do while dears provide the "map" for getting there through high-quality instruction. Lessons need to be designed to ensure accessibility to a general education curriculum designed around rigorous learning standards for all students, including students who learn differently (e.g., students with disabi.gh

As I ead to you, I want you to listen for these things. When lead about a characterrosetting, what the character wants, a problemon a solution, I will stop to add information to my Close Read Recording Form. Then you can add the as information to your form.

Read the story again with the classtopping as appropriate to fill in the rm using a thinkaloud process. For students who need additional support, may need to further scaffold this activity by chunking the text according to the sections on **fibren**. As students become ore familiar with the process, fade the use of modeling and move toward supporting students through guided practice until they are able demonstrate independent use of the graphic organizer.

Close Read Recording Form

Gathering Important Details in a Story

Somebody	
(character)	
person, animal	
Who is the story about	
in	
(setting)	
place, location	
Where did it happen?	
wanted	
(motivation)	
needed, had to get	
What does the	
character want to do?	
but	
(problem)	
something that got in	
the way	
Why can't the characte	r
get what he/she wants'	
SO	
(resolution)	
solution	
Howwas the problem	
solved?	

After thinking more closely about the characters and their motivations, what do you think the lesson of this story is?

Why do you think this?

z z z z z z z z z z z z z z z z	z z z z mmmmmmmmm	Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z	z z z z z z z z z z z z z z z z z

<u>Student actions</u> Students will write their own paragra**pl**using the paragraph frame provided.

Studenthandouts/materials:

ParagraphFrame (found on the nexpage)

Directions: Write a paragraph to answer the questionWhat is one reason you want the power of reading?

One reason I want the power of ading is
Z W Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z
This will help me to
I will be able to

This is why I wanthe power of reading.

Writing Frame

Exemplarfrom:

Module 1: Unit 3: Lesson & Closing and Assessment

Explanation of scaffold

A writing frameprovides support to students who have difficulty organizing the base and recalling teacher directions. In this lesson students are asked to use bank index card to write three things they learned about other countries, two questions they have, and the one country they now think has the hardest time accessing books and why hewriting frameon the following

3-2-1 Exit Ticket

Name
Date
Write three (3)things you learned about other countries
1
2
3

Write two (2) questions that you have

Question 2:_____

Identify the one(1) country you think has the hardest time accessiget(ing) books and explain why

The country that has the hardest time accessing ks is_____

because_____

Guided Practice

Exemplar from: Module 3A: Unit 3: Lesson Work Time C

Explanation of scaffold

Guided practice provides students with opportunities to engage in accurate and successful practice of a new skill with teacher support in the following example, the diting Checklis bund on page 13 } (this guide has been altered to include additional language to provide students with concrete explanations of the checklist's "ratings." A model for guiding students through the process of using

Editing Checklist

Target	Not Yet	Almost There	Excellent!	Teacher Comments
I can capitalize appropriate words, such as character names and titles.	l made more than two mistakes.	l made one or two mistakes.	All names and titles are capitalized correctly.	
I can use simple and compound sentences in my writing.	l did not always use complete sentences.	l used only simple sentences.	I used complete sentences and at least one simple and one compound sentence.	
I can use apostrophes (where appropriate) in my writing to show belonging.	l made more than two mistakes.	l made one or two mistakes.	I appropriately used apostrophes to show belonging.	
I can use resources to check and correct my spelling.		I used resources to check my spelling but still made one or two spelling errors.	I used resources to check my spelling when needed, and all words are	

Sentence Starters

Exemplar from: Module 1: Unit 1: Lesson 4Work Time C

Explanation of scaffold

Sentence starters scaffold expressive language for students who need support participating in-content based conversations with their classmate Although the Conversation Sentence Starters the

Conversation Sentence Starters

The title of my book is ...

I chose this book because ..

My book will take power to read because ...

Explicit Vocabulary Instruction

Exemplar from: Module 1: Unit 1: Lesson 10pening B

Explanation of scaffold

Explicit vocabulary instruction supports students who need systematic and explicit instruction to learn vocabulary due to their limited background knowledge he words notice and wonder were chosen as exemplars because they are critical for students to underist and er to participate in this module lesson However, a systematic, explicit vocabulary procedure can be used in any lewhenever new vocabulary is introduced.

A video exambe of this procedure, modeled by Anita Archer, can be viewed <u>http://explicitinstruction.org/videoelementary/elementaryvideo-4/</u>.

Teacher actions/instructons:

- 1. Introduce the word.
- 2. Provide a studentriendly definition.
- 3. Illustrate with examples.
- 4. Check students' understanding with examples and nonexamples.

Step 1: Introduce the word.

T (teacher): We are going to learn two new words he first word is noticeWhat word?

nt Tol(.)26j3.1247655678m33/34Pl-927⋜((5)aT1thr)20016263(..)2121 ct < < - 36 - 4 (S(student): Notice.

Step 2: Provide a studenfriendly definition. 78 7.75 0 Td (.)Tj /TT3 1 0 Td (.)Tj /TT3r--4(hat)

Frayer Model

Exemplar from: Module 2A: Unit 1: Lesson 2/Vork Time B

Explanation of scaffold

The Frayermodel is a four-square graphic organizer that includes a studeriendly definition, a description of important characteristics, examples, and nonexamplescan be easily adapted t include pictures or icons for students who need additional support the following example demonstrateshow to provide explicit instruction for those students who need information broker down into smaller, more manageable chunks as well as modeling and guided practice to effeuse this tool to learn newconcepts. The Frayer model should be used with conceptual words represent larger ideas or are essential to building knowledge. The word adapted the text as identify key details during their participation in this modules on However, the Frayer model can be used in any lesson to help students strengthen their conceptual knowledge develop their understanding of unfamiliar vocabulary.

Teacher action/sinstructions:

Select key conceptsom the text. These wordschould be limited in numbeandessential to reading comprehension.

Instruct students to complete Frayerordels as follows:

- 1. Write the vocabulary word ithe middle circle.
- 2. Define the wordusing student friendly language, in the finition box. Use your own words.
- 3. Write terms to describe the word in the Characteristics. Again, use your own words.
- 4. List examples of the definition in the Exampless. Draw a picture to help younderstand the word if needed.
- 5. List nonexamples of the definition in the nexamples box. Again, draw a picture if needed.
- 6. Test yourself.

For students who require explicit instruction on how to use the Frayer model, the following sample script is provided:

Step 1: Write the vocabulary word.

T (teacher) I asked you to think about the meaning of adaptations you were rereading today. We are going to use a graphic organizer called a Fragoenter to help us understand what this word means. It is very important we understand what the words mean when we are reading will help us identify key details from a text, so we can successfully comprehend what we are reading erstanding vocabulary will make us better readents of the Frayer model will help us do just that!

Display a large version of the Fragmendel on chartpaperor use a document camera to project yo work. Hand out student copies and direct students to complete their Frayer models as demonstrated.

T: When we use the Frayerordel, the first thing we do is write the vocabulary word in the middle circle. Let's write adaptations in the circle.

Step 2: Define the word.

T: You can see there are alkour boxes. The first box is labeled DefinitionA definition tells us the meaning of the wordLet's see if we can give a definition for adaptations what we've read so far. [Pause for student response]

Adaptations are things about the way an animal looks or the way it acts that helps it to stare, alio survive. Let's write that in the Definitionbox.

Step 3: Describe the word in terms of its characteristics.

T: Thenext box is Characteristics his means we want to think of words that describe adaptations are important to help us understand what it means noticed from our definition that here are two kinds of adaptations physical, or how the animal looks, and behavior how the animal acts. So, I'm going to write "physical" and "behavior" in the Characteristics ox. What else might we want to write here?

S(student): It's something they need to live.

T: Let's write "needed for survival" in the box.

Step 4: List examples.

T: The third box is Example%/hat are some examples of adaptations uread about in the book? Let's see if we can think of at least one physical and one behavior any reasonable answers in the box]

Step 5: List nonexamples.

T: The last box is Nonexamples his is a really important box because it shows we really understand what the word means and what it doesn't means hink about some of the things we read in the book that were <u>no</u>tadaptations. For example, the text said the bullfrog lived behind the house might be an interesting fact, but it's not something physical or behavioral about the bullfrog that the base i alive.

There's one more thing we can doSometimes it helps to have pictures of the examples and nonexamples to help us remember which is white don't have to draw pictures, but if you think it will help you, you can draw some now.

Step 6: Test yourself.

The study step is critical to student success in using vocabulary strategies such as the **5da**/er in Students need to study the terms to internalize them for later used lents can quiz each other during "down times," or themodels/cards can be used as part of a center activity.

Frayer Model (example)

Definition

Things about the way an animal looks or the way it acts that helps it to stay alive to survive
